- Optimized internal processes by automating data matching, resulting in a 60% improvement in operational results.

Project

Strategic Business Intelligence: Ferrari Case Study (<https://github.com/codeebytee/Ferrari-KPI-Dashboard>))

- Consolidated 2016-2024 financial data to create an executive dashboard supporting C-Suite strategic planning.
- Visualized operational efficiency metrics, including Inventory Turnover, EBITDA margins, and P&L waterfalls.

Formula 1 Dashboard (<https://codeebytee.github.io/formula1statsheet/>)

- Developed a responsive F1 Performance Calculator as a single-page application using vanilla JavaScript and Tailwind CSS.
- Implemented data processing logic to analyze local (JSON) F1 race data, calculating and displaying top driver/team statistics based on user-selected tracks.

MarketVision (<https://codeebytee.github.io/MarketVision/>)

- Built a dynamic Stock Analysis Dashboard using vanilla JavaScript, Chart.js, and Tailwind CSS.
- Integrated the Alpha Vantage API to fetch and visualize time-series data, technical indicators, and financial ratios.

Soft skills: Project Coordination, Stakeholder Communication, Adaptability, Consistent
Languages: English (C2), Hindi (C2), Urdu (C1), Italian (B1).
